STONE & ARCHITECTURE

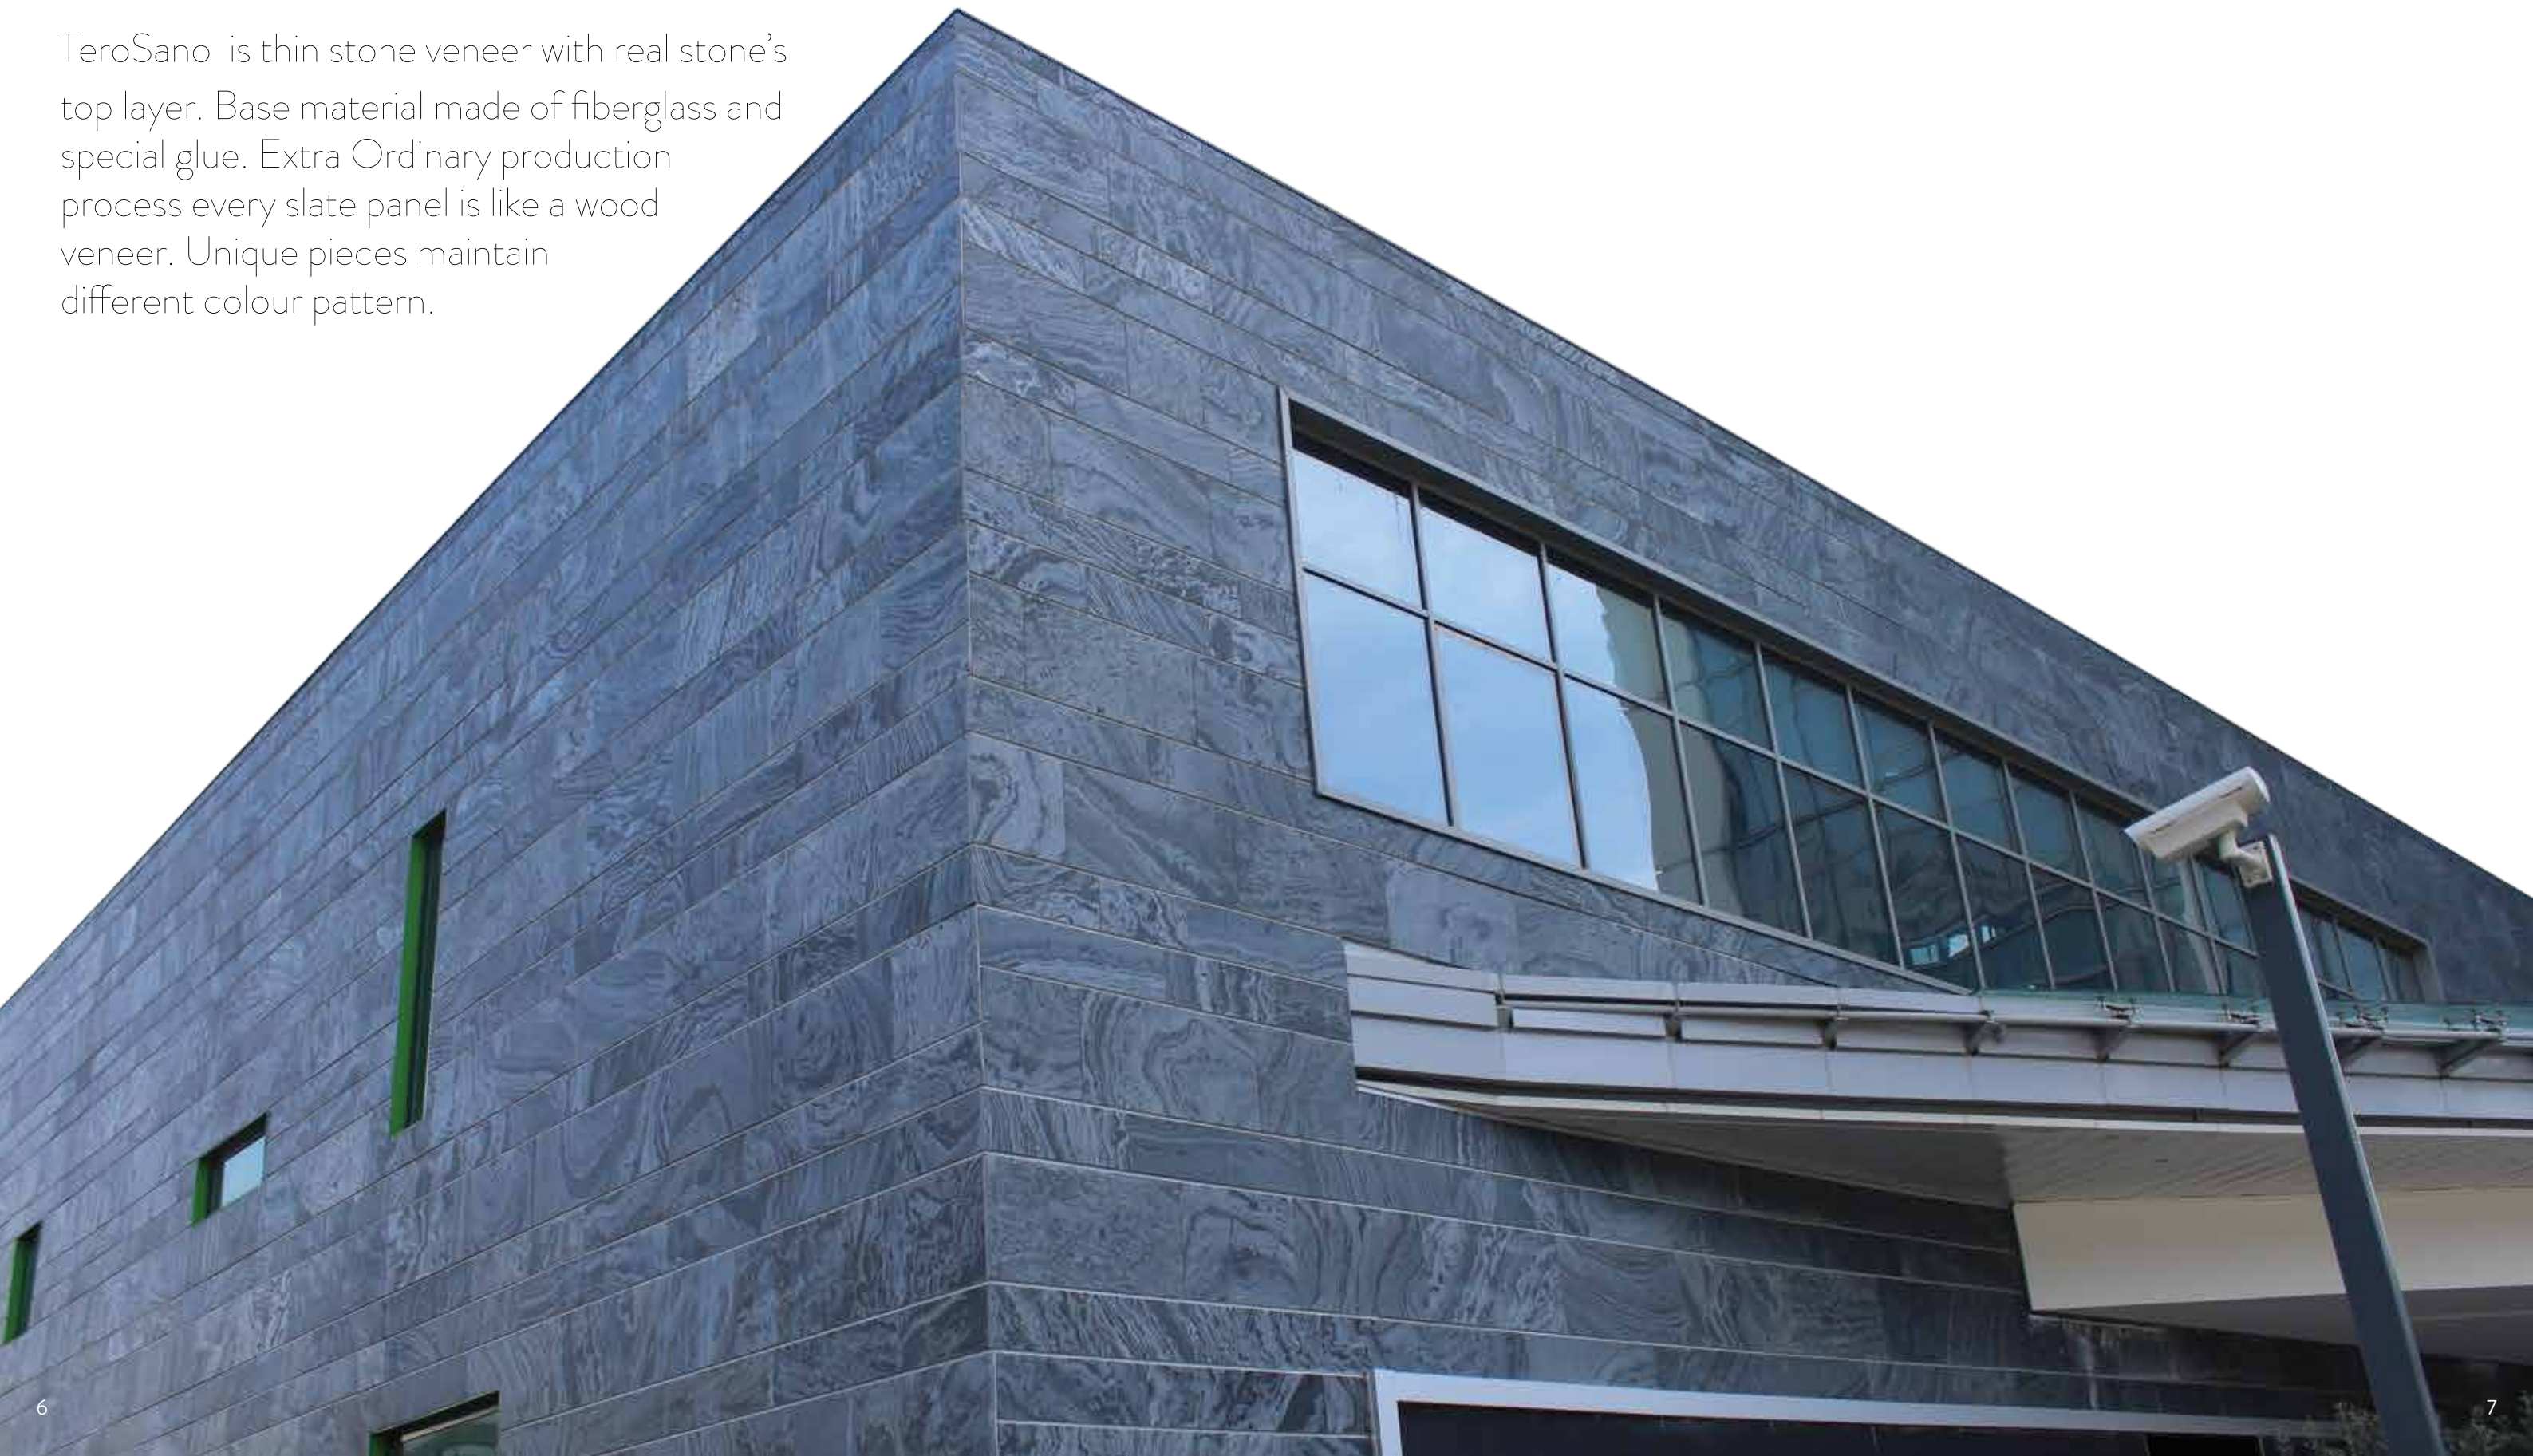

Since Ancient Times stone has left an indelible mark on the World. Wind, water, sand events have created a new appearance of the stone. You can see the great Pyramids of Egypt, Ephesus City columns. They have been bowed but never broken. You need only look around to notice what is the World's Material.

Fleystone is real stone but 2 mm. thin and flexible. So future is ready to change with this material.

Multicolor Quarry

WHAT IS TeroSano?

TeroSano is thin stone veneer with real stone's top layer. Base material made of fiberglass and special glue. Extra Ordinary production process every slate panel is like a wood veneer. Unique pieces maintain different colour pattern.

CAN NATURAL STONE BE FLEXIABLE?

What are the Advantages of TeroSano?

The answer is committed to on
own creativeness: the objects on
show during the outside 2017 Bau
Munich expo.

The Most Advantages are

- Harder & Stronger than slate
- Ultra thin, 2 mm
- High flexibility
- Super light
- Simple and varied applicability
- Durability and eco efficiency
- Transportation cost is very low
- Possibility of applying on facades
- Simple Cutting & Packaging

Overview of Products

FLEXY Classic

TeroSano Classic is the thin stone veneer with fiberglass backing. The material is suitable for all outdoor & indoor areas especially in wet areas like bathroom.

SLIM

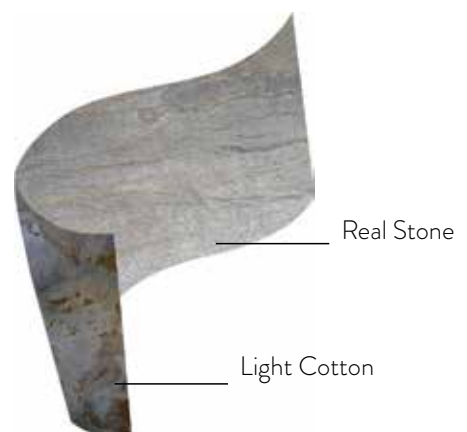

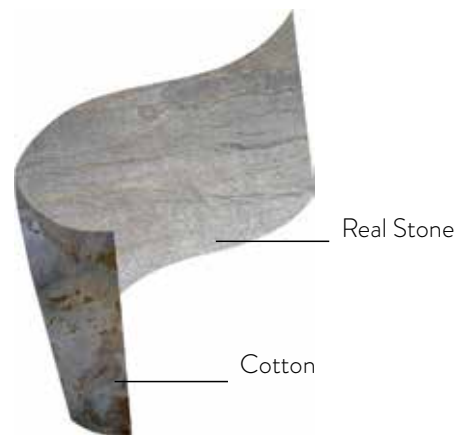

Slimstone is evaluation of classic TeroSano which is extremely thin and more flexible veneer. This advantages is give inspiration to interior designer and furniture sector. The backing Slimstone is cotton based natural fleece.

TRANSLUCENT

Translucent stone has been design for lightening sector. The designers demand to see natural cleft with light and give more effective designs and areas. Translucent stone has the same characteristics as the classic styled but more advantage is being translucent.

MICRO SLIM

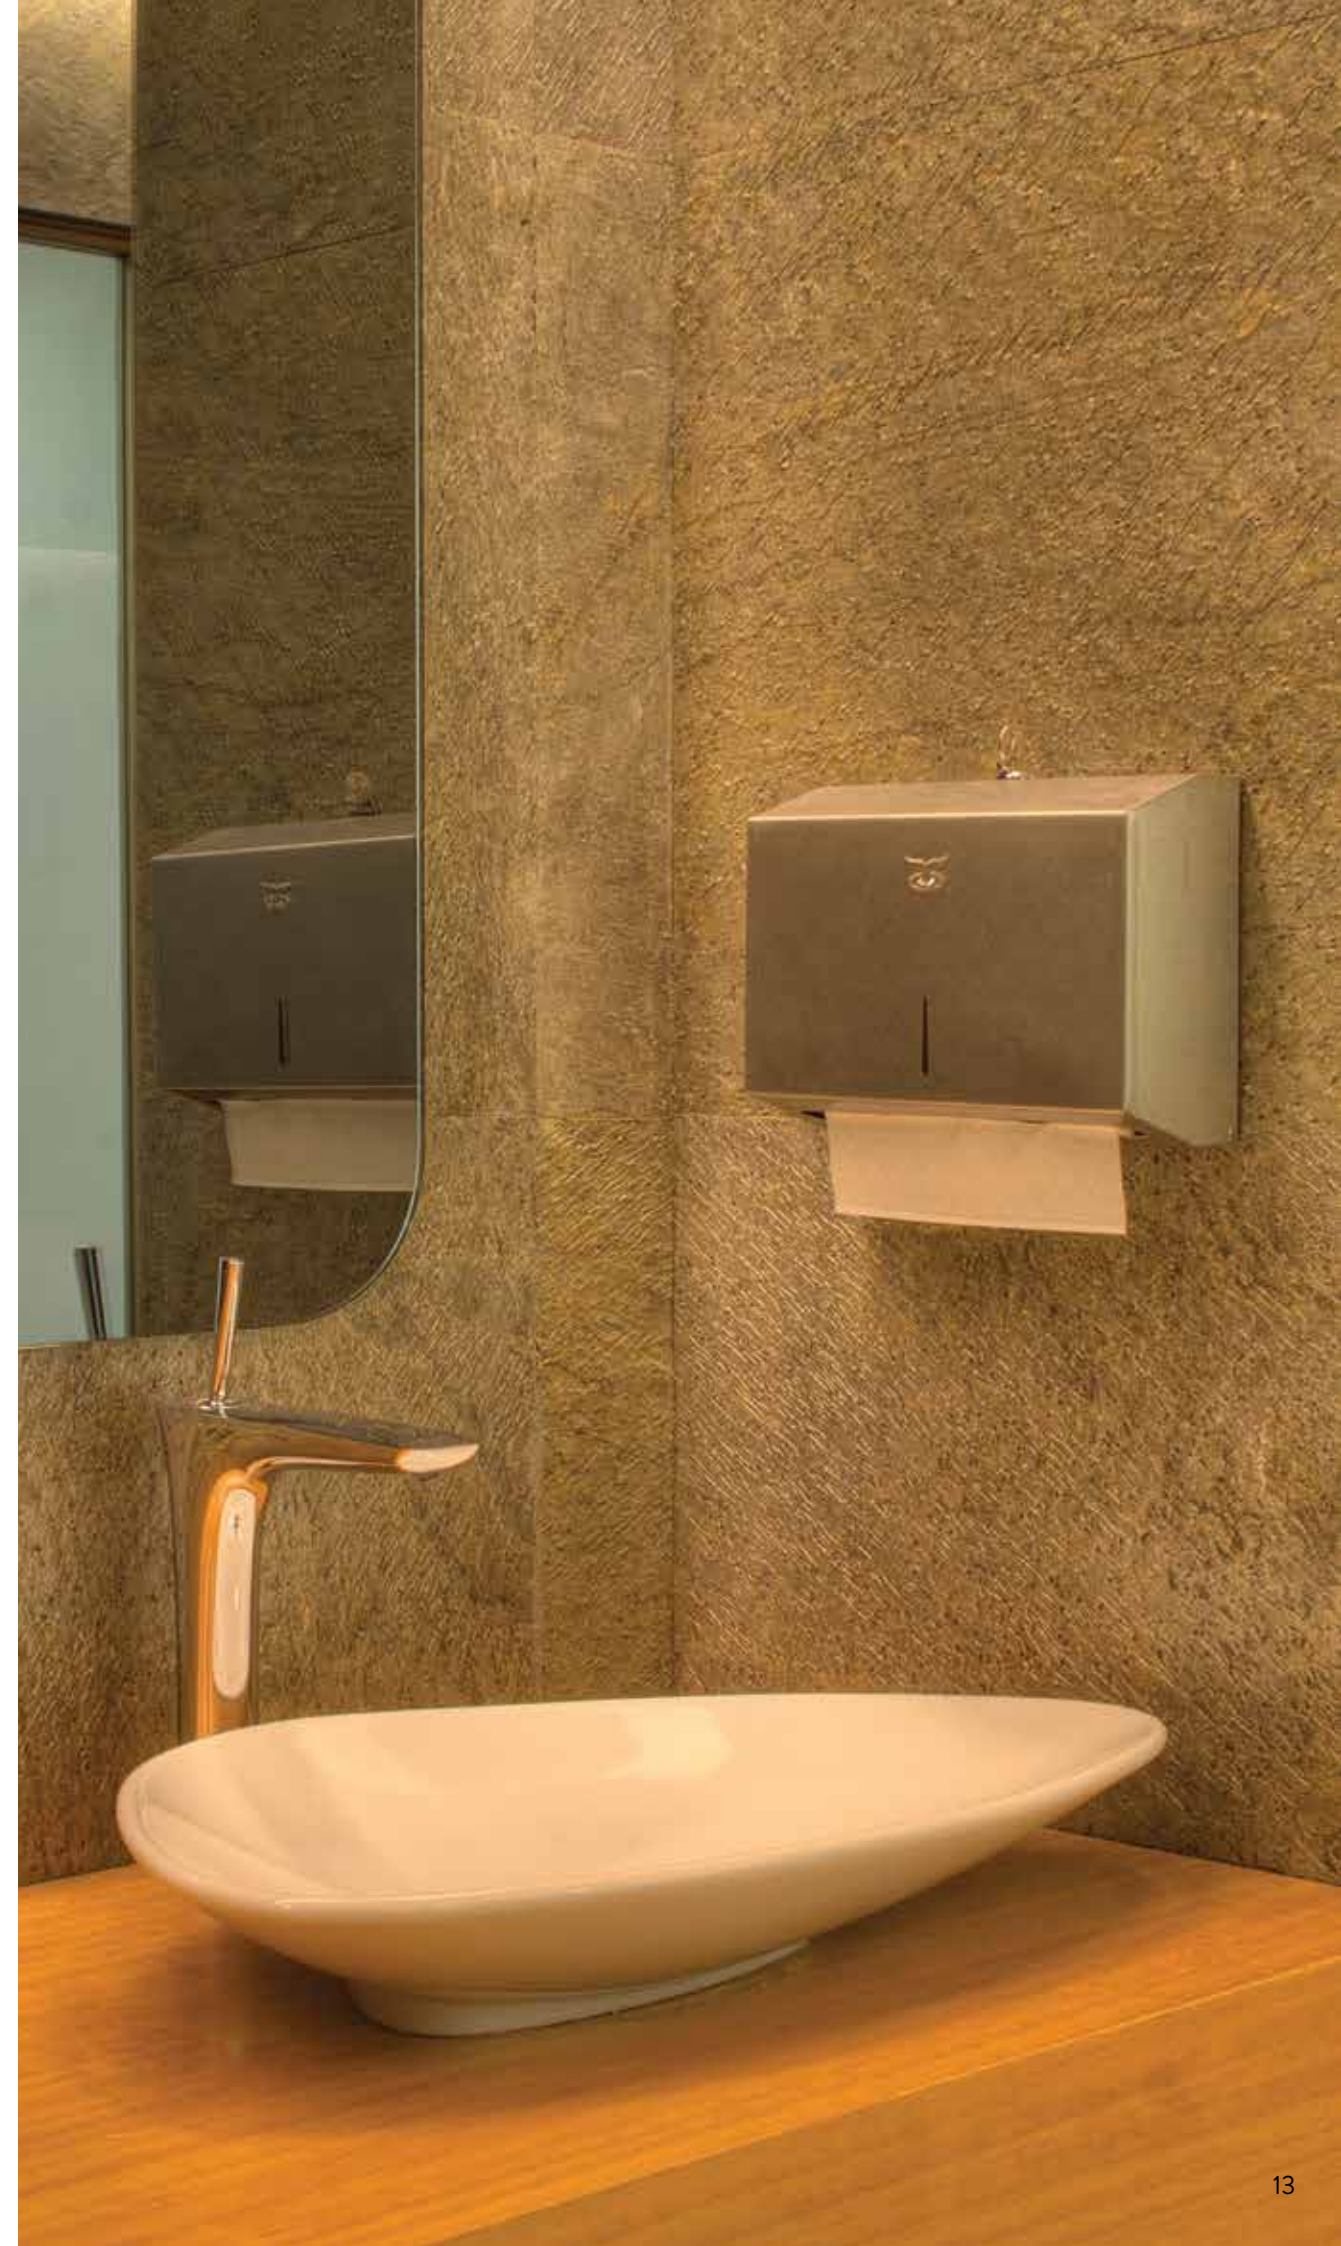

Microslim stone is evolution of slimstone which is ultra thin and more flexible veneer. This advantages give inspiration to interiors designers and furniture sector.
